

## NUMBER PLATES FOR AUSTIN J40

### *License plates*

As a club member and home restorer of a J40, I have made my own press tool to make replica number plates. They are a 99% match for the originals, same thickness steel, correct length and width and they have the all-important half round pressed lip around the perimeter. A coat of paint will make them indistinguishable from the Austin originals. I may need a few days to make, they are supplied in bare cleaned steel for you to paint. Depending upon your bumpers, who made them and when; you may need to gently curve the plates to marry up with the bumper as some bumper recesses are flat, some are curved. Price per single number plate is £17.00, (£32.00 for a pair), including packing; plus, a postage cost of the actual over the counter price at the Post Office for UK 'second recorded' or 'tracked and signed for' outside the UK. I am happy to post to most countries except India where I've had post not arrive, therefore please ask for outside UK. Payment via cheque or PayPal or wire transfer on IBAN.
